bucibot@gmail.com <https://www.linkedin.com/in/tshwanelo-bucibo-b9193ab8/>

I am a Frontend JavaScript / React.js web developer who is passionate about bringing client's visions to life. Since starting my web development career in 2016, I have managed many projects for a diverse client base. My strongest skill is my attention to details, being able to gather client's requirements and translate those into an engaging, effective and unique web application.

EXPERIENCE

MARCH 2021

DIKS T CONSULTING, INTERMEDIATE DEVELOPER

Duties: Fixing any website issues or bugs that arise. Routinely testing websites for ease of use, speed and other quality factors. Working with UX to develop the overall look and design of a website

NOVEMBER 2020 – MARCH 2021

FLAT-BERRY DIGITAL HUB, INTERMEDIATE DEVELOPER

Duties: Gather client's requirements and translate those into an engaging, effective and unique web application.

Project: Online Magazine

Requirements: handle frontend using React.js and Redux. Then app needed to have newsletter subscriptions. Every time when there's a new content I have to update it and change articles. At the later stage I had to add adverts component to the app. I build the site alone from the back end to front-end.

OCTOBER 2018 – AUGUST 2020

BONVELI TRADING AND ENTERPRISE, INTERMEDIATE DEVELOPER

Duties: develop and maintain online magazine application. Develop online clothing store application using Node.js, Express, React js and Redux. Fix bugs of web applications. Add new features for a clothing store and online magazine web applications

Project: Quoting System

Requirements: System must generate monthly invoice according to usage of other system. The quoting system is going to charge per user daily. The calculation goes this way, one user we charge R1.00 per visit. Our invoice has to be for each company

registered in our system. The system is build using, React.js, Redux, MongoDB and Node.js

JUNE 2016 – OCTOBER 2018

SAWDEV SOLUTIONS, JUNIOR DEVELOPER

Duties: Develop a frontend user interface for web applications using React technology. Enhance the performance of web applications. Add new features for web applications.

Project: Web app for loan applications

Requirements: The app was for farmers in Botswana to apply for loans online. This application was made form React and Redux on the front-end and Node.js and MongoDB on the back-end. The application was meant to allow farmers to upload their documents, submit a form with their details and be able to check their application status online. I worked both on the front-end and back-end on this project.
